

Part 1 – Agency Profile

Agency Overview

There are two family medicine residencies in Idaho – the Family Medicine Residency of Idaho (FMRI) in Boise and the ISU Family Medicine Residency (ISU FMR) in Pocatello. Both programs are funded from State allocations, grants, local hospitals, Graduate Medical Education, Medicare and patient revenues. Family Medicine Residency of Idaho (FMRI), was founded in 1975. FMRI is a Federally Qualified Health Center Look-Alike and is governed by a consumer based independent board and is an independent corporate entity and has a Graduate Medical Education Committee that oversees all residency education functions. The Director and CEO of FMRI is Ted Epperly, M.D. and FMRI is affiliated with the University of Washington WWAMI Residency Network.

Core Functions/Idaho Code

There are two core functions of FMRI:

1. Training family physicians to provide care to populations throughout Idaho, to include rural, urban, and suburban.

Idaho ranks 49th out of 50 in physicians per capita and 47th out of 50 for primary care physicians per capita in the USA and has a special problem recruiting physicians to settle in isolated rural Idaho. Ninety five percent of all Idaho counties are Health Professional Shortage Areas for primary care. FMRI has an excellent track record of recruiting family physicians that settle and stay in Idaho. The Residency, including its Caldwell Rural Training Track, is expanding and is growing to 33 residents in training at any one time and will be graduating ten to 11 new family physicians each June. Currently, the residency programs are exceeding their recruitment target of 50% of their graduates staying within Idaho. Of the 221 FMRI graduates, 124 (56%) family physicians have been recruited and settled in Idaho since the beginning of our program.

2. Provision of services to underserved populations in Boise.

Over the last three decades the residency program has become the leading medical provider to the underserved population of Boise. Reimbursement of such medical services has been declining, while program costs have been climbing. FMRI provides over three million dollars in medical services to Medicaid, Medicare and the indigent and absorbs approximately one million dollars of uncompensated care annually. FMRI supports and staffs community services such as the Health Department, adolescent detention centers, prison services, free clinics and HIV clinics. Residents who settle in Idaho communities have an excellent track record of continuing outreach services to Medicare, Medicaid and indigent patients and supporting free clinics in their communities.
