ADDENDUM: CYBERSECURITY COMPLIANCE PLAN

As a technology customer of the Office of the Chief Information Officer (OCIO) in the Department of Administration, we are using the cybersecurity systems and technical expertise in OCIO to fulfill requirements related to Executive Order 2017-02. Staff from OCIO briefed the NIST Core Framework, CIS Controls 1-5, and their plan for adoption of the NIST Cybersecurity Framework in a customer meeting on Feb 23, 2017. Key actions by our organization to support OCIO cybersecurity efforts are to *Identify* (NIST Core Framework first function) critical data in our systems to OCIO. Identifying sensitive data allows OCIO to address the other NIST Core Framework functions: Protect, Detect, Respond, and Recover. We will also participate in DHR and OCIO administered cybersecurity training, as awareness is a critical component of an effective cybersecurity program. As briefed by OCIO staff, implementation of the CIS Controls 1-5 will be their responsibility for the systems they operate and, as technological tools applied to the computer systems, largely invisible to us as a customer.
