Sources and Uses:

The source of revenue is the collection of indirect cost on actual expenditures from federal grants (excluding capital outlay and trustee/benefit payments). The rate applied is negotiated and approved by the U.S. Department of Education annually. The money in this account is used to cover the administrative costs of accounting/human resources in the department, as well as to pay for goods and services that would benefit the agency as a whole that are not directly chargeable to any one program.
