Agency: State Controller

140

Division: State Controller

SC1

Statutory Authority: IC §67-1001

The State Controller is a member of the executive branch of government and one of seven statewide elected officials in Idaho. The office is organized into four divisions: (1) Administration, (2) Statewide Accounting, (3) the Computer Service Center, and (4) Enterprise Business Operations. [Statutory Authority: Section 67-1001, Idaho Code]

The Division of Administration provides administrative, financial, and human resource services for the agency and provides support for the ex-officio duties of the State Controller including serving as Secretary to the Board of Examiners, member of the State Board of Land Commissioners, member of the Idaho Technology Authority (ITA), and as the State Social Security Administrator. As Idaho's Administrator of State Social Security Programs, the State Controller is responsible for ensuring state compliance with Section 218 of the federal Social Security Act.

Additionally, the Controller's Office is tasked with creating and/or administering the following programs (each managed inside of the Division of Administration):

- Houses and maintains the Insight Idaho project, which coalesces data from multiple entities, enabling data-driven, cost-saving decision-making; and the ability to evaluate the effectiveness of various state wide programs within Idaho.
- Provides an online transparency repository with standardized accounting, budgeting, and financial reporting information for state agencies, counties, cities, local districts, and education.
- Manages the Local Governmental Entities Central Registry, a centralized collection portal for all local governmental budget, financial, and debt information.
- Maintains Townhall Idaho, a website that allows agencies and commissions to post meeting notices with associated agendas and provides citizens with the ability to search and review posted meeting and agenda information.
- Maintains records of all state MOU's, MOA's, and agreements in accordance with Idaho Code 67-1085, requiring state officers and agencies to report these agreements to the Controllers Office.

The Division of Statewide Accounting publishes Idaho's Annual Comprehensive Financial Report (ACFR) as well as other statewide and agency-specific reports. Financial reports prepared by the office are critical for maintaining Idaho's high credit rating and obtaining favorable interest rates when issuing tax anticipation notes and other bonds for both state and local governmental entities. The Division provides guidance and support to state agencies for proper internal controls and generally accepted accounting principles to better manage and report the financial affairs of the State of Idaho.

The Division of Statewide Accounting is funded via General Fund appropriation, with funding recovered through the Statewide Cost Allocation Plan (SWCAP).

The Computer Service Center (CSC) maintains one of Idaho's primary state data centers and provides computing technologies and environments and other technology services such as hardware housing, disaster recovery capabilities, security, environmental controls, and applications programming for the Administration, Statewide Accounting, and Enterprise Business Operations divisions, as well as many other state agencies. Among the division's clients is the Office of Information Technology Services (ITS). CSC houses and maintains ITS' capital mall technology and provides a secondary backup location for the state network. The division is funded via a dedicated fund appropriation and bills State Controller divisions and other agency customers directly for provided IT services.

The Enterprise Business Operations (EBO) division is the sustainment team that maintains and facilitates utilization of the State's enterprise resource planning suite, Luma. EBO provides business process and system of record support to state policy owners across five modules: Supply Chain Management (Division of Purchasing), Global Human Resources (Division of Human Resources), Budgeting (Legislative Services Office and Division of Financial Management), Financial Services (State Controller's Office), and Payroll (State Controller's Office). This division processes vendor payments on behalf of state agencies. EBO also runs the State's payroll solution and is responsible for garnishment processing, tax reporting, and electronic fund transfers with major vendors associated with the payroll system. EBO also contains an Operations Bureau and Continuous Improvement Bureau responsible for ensuring that the Luma solution is continuously evolving to improve the functionality of systems, reduce redundancies, and improve overall efficiencies of state business practices.

Enterprise Business Operations is funded by the General Fund with monies recovered through the Statewide Cost Allocation Plan.

140

Fund: Indirect Cost Recovery-SWCAP

12500

Sources and Uses:

The source of revenue is the collection of indirect cost on actual expenditures from federal grants (excluding capital outlay and trustee/benefit payments). The rate applied is negotiated and approved by the U.S. Department of Education annually. The money in this account is used to cover the administrative costs of accounting/human resources in the department, as well as to pay for goods and services that would benefit the agency as a whole that are not directly chargeable to any one program.

H493 of 2018 amended Chapter 10, Title 67, Idaho Code, with the addition of Sections 67-1021A through 67-1021C. Section 67-1021A, Idaho Code, authorized the State Controller to modernize and replace the state's accounting, payroll, human resources, budget. The Business Information Infrastructure Fund is a continuously appropriated fund to be used for the procurement and implementation of a statewide enterprise resource planning (ERP) system including, but not necessarily limited to, financial, payroll, budget.

Explain the request and provide justification for the need.

This request is for the addition of a communications manager within the administration division that would be funded from the general fund and would support the multiple public facing and statewide activities that have been recently added to the SCO. Over the past 4 years, the SCO has been tasked with managing multiple portals and websites that serve not only the state of Idaho operations, but also public citizens. These activities would include TownHall Idaho, Transparent Idaho (primarily adding all 1300+ local districts), Idaho Insights (formally know as the Idaho Criminal Justice Integrated Data System), Local Governmental Central Registry, and multiple other programs. This position is paramount to making sure that timely, accurate information regarding these programs and the impact they have on stakeholders and citizens is being conveyed properly. Without a dedicated communications team to execute on the overall strategy, even the best of programs may fail.

If a supplemental, what emergency is being addressed?

N/A

Specify the authority in statute or rule that supports this request.

H0432 (2021) - Insights
 H0073 (2022) - Local Transparency
 S1416 (2023) - Grants portal

Indicate existing base of PC, OE, and/or CO by source for this request.

What resources are necessary to implement this request?

No other resources required.

List positions, pay grades, full/part-time status, benefits, terms of service.

Will staff be re-directed? If so, describe impact and show changes on org chart.

N/A

Detail any current one-time or ongoing OE or CO and any other future costs.

Ongoing impact to OE would be desktop and workspace operating expenditures for computer, phone, and other desk related equipment for staff.

Describe method of calculation (RFI, market cost, etc.) and contingencies.

Rates and costs were derived from the current DHR statewide job classification information. The rates align with other positions within the state with similar job titles and responsibilities.

Provide detail about the revenue assumptions supporting this request.

N/A

Who is being served by this request and what is the impact if not funded?

This position will primarily serve as the communications conduit between the SCO and both legislators and citizens and local districts. The primary function will aid in making sure that stakeholders are made aware of the types of tools and services available to them. Should this position not be funded, we run the risk of stakeholders not being made aware of services offered and available and misinformation increasing due to a lack of communications.

Identify the measure/goal/priority this will improve in the strat plan or PMR.

What is the anticipated measured outcome if this request is funded?

Agency: State Controller

Explain the request and provide justification for the need.

Admin division level of effort program transfer of FTP and associated costs from SCDA-48000 & SCEA-12600 to SCAA-10000, SCBA-10000, & SCEA-1000. Administration division wage costs are allocated across divisions within the Controller's Office as a consequence of the level of effort expended performing services for these organizations.

If a supplemental, what emergency is being addressed?

N/A

Specify the authority in statute or rule that supports this request.

N/A

Indicate existing base of PC, OE, and/or CO by source for this request.

N/A

What resources are necessary to implement this request?

N/A

List positions, pay grades, full/part-time status, benefits, terms of service.

N/A

Will staff be re-directed? If so, describe impact and show changes on org chart.

Detail any current one-time or ongoing OE or CO and any other future costs.

N/A

Describe method of calculation (RFI, market cost, etc.) and contingencies.

N/A

Provide detail about the revenue assumptions supporting this request.

Funding for the General Fund will be recouped via the SWCAP.

Who is being served by this request and what is the impact if not funded?

Administration division employees. Without this transfer, wages will not be paid from the correct source.

Identify the measure/goal/priority this will improve in the strat plan or PMR.

N/A

What is the anticipated measured outcome if this request is funded?

N/A

DU12.92 Questions and Answers

Explain the request and provide justification for the need.

The SCO requests carryover authority for the Administration Division to complete development of the Insight integrated data system. The Insight program will help answer critical questions surrounding the criminal justice and behavioral health needs across the state and provide data-driven guidance for better policy moving forward.

This authority will provide the additional time required to provide policymakers with a secure, stable, and usable application.

If a supplemental, what emergency is being addressed?

N/A

Specify the authority in statute or rule that supports this request.

House Bill 432 from the second regular session of the Sixty-Fifth Legislature and Idaho Code Title 19 chapter 48.

Please identify the performance measure, goal, or priority this request is intended to improve in the strategic plan or performance measurement report.

N/A

What is the anticipated measured outcome if this request is funded?

N/A

Indicate existing base of PC, OE, and/or CO by source for this request.

The amount to reappropriate will come from the remaining base amount at the end of the fiscal year.

What resources are necessary to implement this request?

Legislative approval.

List positions, pay grades, full/part-time status, benefits, terms of service.

N/A

Will staff be re-directed? If so, describe impact and show changes on org chart.

N/A

Detail any current one-time or ongoing OE or CO and any other future costs.

This request is for a single year.

Describe method of calculation (RFI, market cost, etc.) and contingencies.

Amounts that remain in the fund at the end of FY2025

Provide detail about the revenue assumptions supporting this request.

No additional revenue is anticipated on the implementation funding for this project.

Who is being served by this request and what is the impact if not funded?

This authority will provide the additional time required to provide policymakers with a secure, stable, and usable application.

Explain the request and provide justification for the need.

Requesting two Financial Specialist positions and associated funding for the Division of Statewide Accounting to support statewide Shared Services. It is anticipated that two unused positions from agencies that utilize Shared Services can be repurposed, creating a net zero FTP increase.

The State Controller’s Office is responsible for superintending the fiscal concerns of the state. State agencies have a need to ensure timely and accurate processing of vendor payments and expense reimbursements. In addition, small agency fiscal staff have a need to ensure adequate internal controls through maintaining separation of duties. SCO is providing staff to agencies through a Shared Services Bureau to assist agencies in successfully maintaining separation of duties and timely and accurate payment processing.

Services Offered:

Through the Shared Services Bureau, SCO will make trained staff available to agencies for the following Luma modules:

- Workflow development – setup and management of approval workflows within Luma.
- Expense Management – data entry and approval of expense reimbursements within the XM module.
- Accounts Payable – data entry and approval of vendor payments in Luma, including receiving, contract payments, invoice matching, journalizing transactions, and cash requirements.
- Reporting – expense and revenue tracking, appropriation monitoring, closing package data entry, and budget development.
- Accounts Receivable – invoice and billing creation and processing.
- Cash – monitoring and transferring according to statute.
- Pcard – data entry, tracking, and approval.
- Vendor Management – setting up vendors within Luma.

If a supplemental, what emergency is being addressed?

N/A

Specify the authority in statute or rule that supports this request.

Indicate existing base of PC, OE, and/or CO by source for this request.

What resources are necessary to implement this request?

HR resources will work to solidify these positions into permanent funding positions. Otherwise, no other resources are necessary.

List positions, pay grades, full/part-time status, benefits, terms of service.

Will staff be re-directed? If so, describe impact and show changes on org chart.

Staff are not being re-directed but solidified from their current limited-service project positions to sustainment positions.

Detail any current one-time or ongoing OE or CO and any other future costs.

Ongoing impact to OE would be desktop and workspace operating expenditures for computer, phone, and other desk related equipment for staff.

Describe method of calculation (RFI, market cost, etc.) and contingencies.

Rates and personnel costs are derived from currently filled temporary positions for the project and represent CECs followed the continuous appropriated fund over the past few years, market conditions of employment, and equity in duty at the State Controller's office.

Provide detail about the revenue assumptions supporting this request.

The expected recovery model is a General Funded appropriation for these services. The General Fund expenditures would then be recovered through the SWCAP (Statewide Cost Allocation Plan) from all agencies that utilize the central services of the state on a two-year cycle.

Who is being served by this request and what is the impact if not funded?

Any agencies requiring assistance with accounting services.

Identify the measure/goal/priority this will improve in the strat plan or PMR.

What is the anticipated measured outcome if this request is funded?

Explain the request and provide justification for the need.

A spending authority increase for the Data Processing Fund within the Computer Services Center is required to cover Luma operating costs that will be shifted from the Business Information Infrastructure Fund (BIIF) once the BIIF expires at the end of FY 2025.

The BIIF has been the funding mechanism to pay for Luma project and sustainment costs. However, with the decommissioning of the mainframe and the sunseting of the BIIF at the end of FY 2025, all related Luma technology costs will be assumed by the CSC. The additional costs are due to the increased capability, capacity, and cost of a modern ERP system and the centralization of many other finance, budget, procurement, human resource, and payroll systems throughout the state

If a supplemental, what emergency is being addressed?

N/A

Specify the authority in statute or rule that supports this request.

The authority to manage the accounting and payroll systems of the state of Idaho and organization structure for the office are espoused in Idaho Code - 67-1021. The Luma Leadership Council and Governance Structure is defined under Idaho Code - 67-1021A, 67-1021B, and 67-1021C. The constitutional authority is referenced in Article 1 Section 4.

Indicate existing base of PC, OE, and/or CO by source for this request.

What resources are necessary to implement this request?

No other resources required.

List positions, pay grades, full/part-time status, benefits, terms of service.

N/A

Will staff be re-directed? If so, describe impact and show changes on org chart.

N/A

Detail any current one-time or ongoing OE or CO and any other future costs.

New OE & CO costs required to maintain the Luma infrastructure.

Describe method of calculation (RFI, market cost, etc.) and contingencies.

Costs were calculated using known current and future costs that have already been established and for which the state is under contract.

Provide detail about the revenue assumptions supporting this request.

Costs to the CSC will be recovered by direct bill to the Enterprise Business Operations (EBO) division. Luma costs paid by EBO will then be recovered via the Statewide Cost Allocation Plan (SWCAP) within two years after the close of each fiscal year.

Who is being served by this request and what is the impact if not funded?

Agency personnel are directly supported by the central services provided by Luma. Luma is critical to ensuring agencies can perform their fiscal, payroll, human resource, and procurement responsibilities. Additionally, the added resources centrally due to the consolidation of systems should eliminate a great amount of duplicative agency-level requirements over-time for personnel and operational resources across the state as economies of scale can be obtained through the investment in resources centrally and the continued consolidation of systems that agencies individually supported.

If sufficient resources are not funded, the state risks not realizing the long-term benefits of this very significant investment to modernize and streamline the back-office systems, which could very likely result in the reemergence of siloed data and proliferation of duplicative systems and their subsequent costs across the state.

Identify the measure/goal/priority this will improve in the strat plan or PMR.

What is the anticipated measured outcome if this request is funded?

AGENCY: State Controller's Office (140)

DU12.91 Questions and Answers

Explain the request and provide justification for the need.

Requests continuance of carryover authority for the Computer Service Center (CSC) to help meet ever-changing customer needs. This authority provides flexibility critical to negotiating better pricing and contract terms when making substantial technology purchases, resulting in significant cost savings for taxpayers.

If a supplemental, what emergency is being addressed?

N/A

Specify the authority in statute or rule that supports this request.

Idaho Code Title 67 Chapter 10.

Please identify the performance measure, goal, or priority this request is intended to improve in the strategic plan or performance measurement report.

N/A

What is the anticipated measured outcome if this request is funded?

N/A

Indicate existing base of PC, OE, and/or CO by source for this request.

The amount to reappropriate will come from the remaining base amount at the end of the fiscal year.

What resources are necessary to implement this request?

Legislative approval.

List positions, pay grades, full/part-time status, benefits, terms of service.

N/A

Will staff be re-directed? If so, describe impact and show changes on org chart.

N/A

Detail any current one-time or ongoing OE or CO and any other future costs.

This request is for a single year.

Describe method of calculation (RFI, market cost, etc.) and contingencies.

Amounts that remain in the fund at the end of FY2025

Provide detail about the revenue assumptions supporting this request.

Based on CSC services provided.

Who is being served by this request and what is the impact if not funded?

This authority provides flexibility critical to negotiating better pricing and contract terms when making substantial technology purchases, resulting in significant cost savings for taxpayers.

Explain the request and provide justification for the need.

This request is for funding of the already appropriated 13 FTP that are currently being funded by the one-time BIIF project funds and the addition of 1 product manager, four training specialists, and 2 financial specialist personnel needed to support agency personnel's continued process improvement and full utilization of Luma. These positions are critical to the support of 85+ agencies and roughly 25,000 employees across the state. Additionally, these central support personnel will aid in the on-going realization of the benefits of Luma in reducing duplication of systems and processes across the state.

Over time, agencies have purchased/built duplicative systems due to lack of functionality in the legacy systems that created lack of visibility in financial and human capital operations of the state as well as increased costs associated with software and the needed support of duplicative systems by agency personnel. Centralizing these services under a modern tool set with central support and utilizing enterprise purchasing capabilities that leverages the entire state's buying power will reduce hidden support costs of duplicative systems in each agency. These positions centrally will work with the other central services of the state to ensure standards are maintained and wasteful duplication of tools does not continue to proliferate.

The additional training personnel are needed to provide support to the changing employment of the state personnel. These resources will work to provide not only training to aid adoption of the platforms and tools provided by Luma, but also aid process changes that will provide greater

standardization and clarity of data for decision makers over time. This team will provide agencies the critical feedback loop needed to adapt processes, utilize already deployed tools, and enhance the suite of tools so the state can realize the continuous improvement of enterprise solutions to further diminish the need for other technology or services in the state. Additionally, this team will work to provide certifications for employees to continue to grow knowledge and experience needed to realize efficiencies over time that were created by siloed agency only training of staff under the legacy model.

The additional financial support personnel are needed to support the consolidated Grant Management processes and Cash Management activity for the state. The system standardization opportunity for grant management processes will aid support of agencies in standardizing grant distribution and sub-recipient monitoring that is currently being done in disparate systems across the state. Added support in the Cash Management area is needed to ensure agencies have the needed support for this critical function.

Without these positions the Controller's office will not be able to meet demands of the changing workforce in support of the constitutional duties of the office, nor meet the projected efficiencies outlined in the business case for Luma, as process will eventually fall back to legacy agency siloed activity.

If a supplemental, what emergency is being addressed?

N/A

Specify the authority in statute or rule that supports this request.

The authority to manage the accounting and payroll systems of the state of Idaho and organization structure for the office are espoused in Idaho Code - 67-1021. The Luma Leadership Council and Governance Structure is defined under Idaho Code - 67-1021A, 67-1021B, and 67-1021C. The constitutional authority is referenced in Article 1 Section 4.

Indicate existing base of PC, OE, and/or CO by source for this request.

Sufficient OE is available to cover desktop expenditures. No other on-going resources are available to support this request.

What resources are necessary to implement this request?

HR resources will work to solidify these positions into permanent funding positions. Otherwise, no other resources are necessary.

List positions, pay grades, full/part-time status, benefits, terms of service.

Will staff be re-directed? If so, describe impact and show changes on org chart.

Staff are not being re-directed but solidified from their current limited-service project positions to sustainment positions. The organizational chart already represents this group as necessary for sustainment operations as part of the Continuous Improvement Bureau.

Detail any current one-time or ongoing OE or CO and any other future costs.

The only impact on OE, which is already covered by project funds, would be the desktop and workspace operating expenditures for computer, phone, and other desk related equipment for staff. These items were already purchased as part of the project and can be utilized for on-going operational activity.

Describe method of calculation (RFI, market cost, etc.) and contingencies.

Rates and personnel costs are derived from currently filled temporary positions for the project and represent CECs followed the continuous appropriated fund over the past few years, market conditions of employment, and equity in duty at the State Controller's office.

Provide detail about the revenue assumptions supporting this request.

The request is for personnel funding for needed resources to properly provide central support for the 25,000+ employees across the state in conjunction with other central service providers. The current recovery model is a General Funded appropriation for these services. The General Fund expenditures are then recovered through the SWCAP (Statewide Cost Allocation Plan) from all agencies that utilize the central services of the state on a two-year cycle.

For FY 2026, the estimated remaining \$1 million BIF balance can be transferred to the General Fund as a partial funding solution. Remaining FY 2026 and ongoing funding can be provided from the Indirect Cost Recovery Fund (SWCAP).

Who is being served by this request and what is the impact if not funded?

Agency personnel are directly supported by the central services teams, and specifically the Luma support teams that currently are either limited service or one-time funded. These personnel are critical to ensuring agencies can do their work and continue to learn process improvements over-time. Additionally, the added resources centrally due to the consolidation of systems should eliminate a great amount of duplicative agency-level requirements over-time for personnel and operational resources across the state as economies of scale can be obtained through the investment in resources centrally and the continued consolidation of systems that agencies individually supported. Through the efficient service of agency personnel, Idaho businesses, citizens, and the general public benefit from the service provided by these positions.

If sufficient resources are not funded, the state risks not realizing the long-term benefits of this very significant investment to modernize and streamline the back-office systems, which could very likely result in the reemergence of siloed data and proliferation of duplicative systems and their subsequent costs across the state. These positions are critical to the continuous improvement of the systems and processes needed to meet efficiencies projected over the 10-year ROI.

Identify the measure/goal/priority this will improve in the strat plan or PMR.

What is the anticipated measured outcome if this request is funded?

Operating Expense Total	6,800,000	0	0	6,800,000
	6,800,000	0	0	6,800,000

Explain the request and provide justification for the need.

Historically, costs for centralized accounting and payroll services provided through the mainframe were recovered by monthly invoice payments issued to state agencies. In order to simplify the budgeting process for agencies, the State Controller's Office will move away from monthly direct invoices for Luma services sent to every agency throughout the state, and the Computer Services Center (CSC) within the Controller's Office will seek recoupment of Luma costs from the Enterprise Business Operations (EBO) division; the costs to EBO will then be recovered through the Statewide Cost Allocation Plan (SWCAP) process.

This modified billing process will reduce budgetary and frequent fiscal administrative overhead for agencies.

If a supplemental, what emergency is being addressed?

FISCAL YR:	ACTUAL 2024	ESTIMATE 2025	REQUEST 2026	REQUEST 2027	REQUEST 2028	REQUEST 2029
	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

IMPORTANT NOTES:

1. Upon completion, please send to the State Leasing Program in the Division of Public Works via email to Caitlin.Ross@adm.idaho.gov. Please e-mail or call 208-332-1933 with any questions.
2. If you have five or more locations, please summarize the information on the Facility Information Summary Sheet and include this summary sheet with your submittal.
3. Attach a hardcopy of this submittal, as well as the Facility Information Summary Sheet, if applicable, with your budget request. **DPW LEASING DOES NOT NEED A COPY OF YOUR BUDGET REQUEST, JUST THIS FORM.**
